Sony NSR - 1200

Sony NSR-1050H, 1100 and 1200 can be used for the projects requiring massive video storage. JetStor iSCSI arrays can easily connect and expand to 160TB at the industry's leading performance/price value.

JetStor RAID Systems

All JetStor RAID systems feature:

- High-performance RISC storage-specific processors
- Dedicated parity processors for high-speed RAID 5 and RAID 6 performance
- Advanced RAID features that speed deployment, increase reliability and simplify management
- Completely cableless design for higher reliability and ease of maintenance
- JetStor RAID Manager software for configuring and monitoring all JetStor systems over your network
- Five year warranty on disk drives, and three years on all other components. Optional on-site service also available
- Free telephone and email support provided for the life of the unit

Quad 1GB/s iSCSI to SATA II / SAS

JetStor SAS P55016iS

- Quad 1Gb/s iSCSI connectivity
- Up to 32TB raw capacity per chassis
- Powerful Intel Xscale 64-bit RISC processor for blazingly fast I/O operations, parity-assist ASIC, iSCSI assist engine, TCP Offload Engine (TOE)
- Scalable to 160TB raw capacity with expansion enclosures
- 3U Rackmount

Quad 1Gbit/sec iSCSI to SATA II / SAS

JetStor SAS P55012iS

- Up to twelve SAS or SATA drives
- Quad 1GB/s iSCSI connectivity
- Up to 24TB raw storage capacity per enclosure
- Powerful Intel Xscale 64-bit RISC processor for blazingly fast I/O operations, parity-assist ASIC, iSCSI assist engine, TCP Offload Engine (TOE)
- Scalable to 152TB with expansion enclosures
- 2U Rackmount
